

High-throughput approach for metabolic stability screening in hepatocytes

Milic A, Jurmanovic S, Markovic A, Marjanovic N, Padovan J

- A RAPID HT SCREENING TOOL FOR METABOLIC STABILITY SCREENING IN HEPATOCYTES IN EARLY DRUG DISCOVERY
 - increase number of compounds tested per vial
 - shorten time of analysis
 - reduce assay cost per compound
- ASSAY SET-UP:
 - measurements at two time-points
 - final result: %remaining
 - ✓ correlation >0.9
